

## External Lubricant PE Wax VN-PEW01

VN-PEW01 is an external lubricant for PVC products, it is used in many applications to improve processing and end product properties.

### Technical Index

Item	Index
Appearance	White powder
Density (g/cm <sup>3</sup> )	0.91-0.92
Viscosity(at 140°C/mPa·s)	5-10
Hardness/dmr	2-3
Softening point (°C)	100-105
Molecular weight (Mn)	1800-2300

### Properties

- 1) Excellent lubricity;
- 2) Good cold and heat resistance;
- 3) Good chemical and abrasion resistance;

### Applications

VN-PEW01 is used in a variety of applications as release agents and lubricants. These include Ca-Zn stabilizer, lead stabilizer, PVC products, road marking paint, rubber etc.

### Packaging and Storage

25kg/bag

It should be stored in a cool and dry place with good ventilation.
